

VIRTUAL TRAINING

NFPA 70E Training

Arc Flash and Electrical Safety Awareness

Everyone has responsibility for electrical safety in the workplace, and this in-depth training will provide you with the ability to identify Arc Flash and electrical safety hazards. You will learn techniques and best practices to limit exposure to these identified hazards. Key concepts presented in this course include:

- Hazards related to an Arc Flash/Blast
- Industry recognized standards and regulations—NFPA 70E
- Worker protection and OSHA compliance
- Workplace practices to limit hazard exposure and risk
- Arc Flash risk reduction solutions

During this four hour training, you will acquire the necessary safety detection skills, enabling you to protect both yourself and your fellow employees.
