

KENDALL CONNECTION LIVE

CONTROLLER AND I/O UPDATE

Join us in-person to learn more about the latest controller and Input/Output Modules (I/O) from Rockwell Automation.

Smart Machines require control solutions to meet today's needs; they also need to be future-ready for tomorrow's business challenges. Join us as we look at scalable Logix solutions and controllers from Rockwell Automation.

From complex to simple applications, Rockwell Automation has the programmable automation controller (PAC) or programmable logic controller (PLC) to meet your requirements. During this session, we will prepare you to confidently select the correct controller and I/O products to fit your specific needs.

FEATURED SESSION TOPICS:

- How Ethernet network affects your controller requirements
- Selecting the correct controller
- Introduction of Process Controllers with PlantPAX 5.0
- Modernization plans for legacy MicroLogix, SLC-500 and PLC-5 systems
- I/O platform comparison with processor compatibility information
- Connected Components Workbench (CCW)—Version 13
- Studio 5000—Logix Designer, Version 34
