

TECHNOLOGY UPDATE MODERNIZATION AND NAVIGATING OBSOLESCENCE

Reduce downtime risks associated with outdated hardware.

Although Rockwell Automation products have been known to last for years after they become obsolete, there is good reason to consider modernizing your automation systems earlier. If you're not prepared, product failures of obsolete products can lead to more expensive and longer than necessary downtime situations. Let us help you prepare! Discover the tools, products, and services that assist with modernizing obsolete equipment during this session.

SESSION TOPICS

- SLC 500
- MicroLogix
- PLC 5
- PanelView
- Ultra 3000
